

Kirk:

Hope you had a great weekend.

Needed to pull my trailer yesterday and even Friday when I left your place, there was a very noticeable improvement in the drivability of the Avalanche. As weird as Vic looked at me when I was explaining or trying too, he solved the problem. Solid smooth acceleration without having to drop down a gear. It pulls the way I expect. No stumbling just strong pull.

Robinson Automotive has solved what I'm sure would not have been resolved at other repair shops!!!

In addition, it was great to catch up with you. Certainly keep in touch.
